## P R O F I L E

Innovative task-driven Fullstack Developer with 4 years of experience in web design and development. Equipped with a record of success in consistently identifying and providing the technological needs of companies through ingenious innovation. Proficient in developing databases, creating user interfaces, writing & testing code, troubleshooting simple/complex issues and implementing new features based on user feedback.

## E D U C A T I O N

### ● Computer Sciences

University of Hull  
2015 – 2017

### ● UI/UX Design

Coursera  
2019 – 2019

### ● Software Engineering

Code Academy  
2019 – 2020

## E X P E R I E N C E

### ● Junior Fullstack Developer

From 2018 to 2020 | Schauenburg Systems

As a *Junior Fullstack Developer* my responsibilities were to develop and maintain company web applications using front-end technologies like HTML, CSS, JavaScript & React, and back-end technologies like Node.js, Express and databases like MySQL. Collaborating with designers and other developers to create and implement new features and improve existing ones. Writing clean, efficient and well-documented code that adhere to coding standards and best practices. Participating in code reviews and contributing to the teams technical knowledge base.

### ● Fullstack Developer

From 2021-2022 | Channel Dynamix

As a *Fullstack Developer* my responsibilities were to design, develop and maintain complex web applications using modern technologies such as React, Node.js & MongoDB. Lead the development of web applications from start to finish, including designing, coding, testing & deploying. Collaborate with other developers and stakeholders to understand requirements and build high-quality web applications that meet business needs. Participate in code reviews, testing and deployment processes to ensure high quality deliverables. Identify and troubleshoot issues and bugs in the web applications and work to resolve them.

### ● Technical Support

From 2022-11 – Current | Digital Mall

As a *Technical Support Agent* my responsibilities are Resolving technical issues by providing step-by-step instructions, explaining product features and functionalities, and assisting customers in troubleshooting their hardware, software, or network-related problems. Identifying and diagnosing technical problems reported by customers and guiding them through the resolution process. This may involve asking probing questions to gather necessary information and using problem-solving skills to provide solutions.

## C E R T I F I C A T E S

### BSc Computer Science & Informatics (2017)

For completing my Bachelors Degree In Computer Science at Hull University

### Google UI/UX Design Certification (2019)

For completing the Google UI/UX design short course through Coursera

### Software Engineering (2020)

For completing a 1 year Software Engineering bootcamp at CodeSpace
